The Routing Identifier Code (RIC) is a three-digit code used to represent the address of the recipient of the document (rp 4-6); to denote the actual consignor of material (rp 67-69); or to identify the supply activity originating the action (rp 4-6). This listing provides RICs of some larger activities. See NAVSUP P-485 for a full listing.

## MEDIA AND STATUS CODE (RECORD POSITION 7)

The Media and Status Code (M&S) indicates the recipient of status and the means of transmission. The M&S Code may indicate that status is to be furnished to the requisitioner (rp 30-35) or the supplementary addressee (rp 45-50) and an activity identified by a distribution code in rp 54, if one is entered. Intra-Navy ammunition requisitions are the only exception. When a valid Navy UIC is entered in rp 45-50 on an ammunition requisition, supply status will be sent to the requisitioner and the supplementary address as well as the monitoring activity when one is prescribed by an entry in rp 54.

For 13-digit NSNs (National Stock Number), the FSC (Federal Supply Class) will be entered in positions 8-11 and the NIIN (National Item Identification Number) will be entered in positions 12-20. Whenever a SMIC (Special Material Identification Code) is assigned, enter it in positions 21-22. For nonstocked items, the Commercial and Government Entity Code (CAGE CODE), formerly the FSCM (Federal Supply Code for Manufacturers) will be entered in positions 8-12 and the manufacturer's part number, if ten (10) digits or less, in positions 13-22. Enter the number from left-to-right leaving any remaining positions in the field blank. If the part number exceeds ten (10) digits use a DD Form 1348-6. Special instructions apply to nonstandard and other numbers.

**UNIT OF ISSUE (RECORD POSITIONS 23-24)**

The Unit of Issue is an abbreviation describing the standard unit under which material is ordered and issued. It is comprised of two alpha characters.

**QUANTITY - (RECORD POSITIONS 25-29)**

The quantity is the number of units required for the requested item. Numeric zeros will precede significant digits in the quantity field. For intra-Navy ammunition requisitions only, Code M may be used in rp 29 to designate thousands when the quantity exceeds the five-digit field limitation. For example, a quantity of 100,000 may be expressed as "O1OOM". When a residual quantity is desired which is not divisible by 1,000 a second requisition will be prepared for the residual amount. If the quantity exceeds "9999M" additional requisitions will be prepared.

**DOCUMENT NUMBER - (RECORD POSITIONS 30-43)**

The document number is a fourteen-digit, unique number constructed of four basic elements as follows:

<u>Position</u>	<u>Element</u>	<u>Example</u>	<u>Explanation</u>
30	Service Code - a single character identifying a service or element of a service	A, B, C, W D, E, F, J G K, L, M N, P, Q N R V S, T, U Z H	Army Air Force GSA Marine Corps Navy Navy - other than CINCLANT/PAC Navy - Pacific Fleet Navy - Atlantic Fleet DLA Coast Guard Other DoD Activities
31-35	Requisitioner	00207	Unit Identification Code
36-39	Ordinal Date	5043	5 for 2005 and 043 for 12 Feb
40-43	Serial Number	2101	Never duplicated on the same day. May be alpha or numeric (alphas "I" and "O" are prohibited).

## DEMAND CODE - (RECORD POSITION 44)

The Demand Code is entered by the originator of the requisition as follows:

<u>Code</u>	<u>Explanation</u>
I	Inactivated item demand that will only be used by DAAS on DI A0_.
N	Nonrecurring demand: use when the item is requisitioned for a requirement known to be a one-time occurrence.
O	No demand: use for (1) submitting requisitions for substitute items in lieu of previously requisitioned items (2) initial fill of PWRMS consumable item requirements (3) resubmission of previously requisitioned requirements under a new document number when associated with shortage or non-receipt for which shipment status was received.
P	Nonrecurring demand for special program requirements stocked by an IM in anticipation of such demands.
R	Recurring demand when the item is requisitioned to replace an item currently in use or in stock.
S	Commissary resale demand for perishable and nonperishable subsistence items only for resale (troop subsistence, however, will only use "R" and "N").

## SUFFIX CODE - (RECORD POSITION 44)

The suffix code identifies separate partial supply actions taken on the original requisition without losing the identity of the original document number. When the requisition is processed on a partial basis, a suffix code letter or number replaces the demand code in each transaction. For instructions on assigning suffix codes refer to NAVSUP P-485, Volume II, Appendix 8F.

## SUPPLEMENTARY ADDRESS - (RECORD POSITIONS 45-50)

This field will be used to identify the service and activity address to receive material, billing, or status - as indicated by the assignment of Signal Codes B, J, K, L or M and/or Media and Status Codes 4, 5, D, E, M, N, U or V. The letter "Y" may be entered in position 45 to indicate that the data in positions 46-50 is insignificant to the system but is to be perpetuated in document processing. When rp 30 contains a valid activity alpha designator and rp 45 contains a zero, DAAS will change the zero in rp 45 to "Y".

## SIGNAL CODE - (RECORD POSITION 51)

Not applicable for FMS. For FMS ship-to addresses, refer to DoD 4500.9-R (DTR), Appendix K or <https://day2k1.daas.dla.mil/dodaac/mapac.asp>.

In the Material Returns Program (FT Series), the signal code designates the fields containing the intended consignor (ship from) and the authority to receive and process credits, when applicable. When the material is to be shipped from the activity in rp 30 to 35 or 45 to 50, the Signal Code will be as follows:

<u>Code</u>	<u>Shipped From</u>	<u>Credit To</u>

## FUND CODE - (RECORD POSITIONS 52-53)

The fund code is a two-digit code that indicates the funds to be charged, i.e. the bill-to office. The fund code will be translated to an appropriation or fund account (charged or credited) based upon the assigned code of the billed office. A complete list of valid fleet fund codes is contained in the NAVSUP P-485, Volume II, Appendix 30.

**DISTRIBUTION FIELD (RECORD POSITIONS 54-56)**

The Distribution Field is a dual purpose field. The appropriate Distribution Code will be entered in position 54 when additional status must be furnished to a monitoring activity. The appropriate Cognizance Symbol will be entered in positions 55-56 of all Navy requisitions.

**PROJECT CODES (RECORD POSITIONS 57-59)**

Entries in record positions 57-59 will contain a project code; they are a mandatory entry for Navy activities. Project codes contained in requisitions will be perpetuated in all related documentation and appear as a part of the shipping container markings. Project codes are not related to priority. Project codes (other than Joint Chiefs of Staff project codes, i.e., 9 series codes) do not alter or override the priority assigned a requisition or shipment. See Appendix 6 of the NAVSUP P-485 Volume II for a listing of project codes.

**PRIORITY DESIGNATOR (RECORD POSITIONS 60-61)**

The priority designator is determined by combining the assigned Force/Activity Designator (F/AD) and the appropriate Urgency of Need Designator (UND) as shown in the following table.

Urgency of Need Designator		FAD				
		I	II	III	IV	v
		Priority Designator				
A	Unable to Perform	01	02	03	07	08
B	Performance Impaired	04	05	06	09	10
C	Routine	11	12	13	14	15

**REQUIRED DELIVERY DATE (RECORD POSITIONS 62-64)**

When the computed Standard Delivery Date (SDD) is unsatisfactory, an RDD may be entered in card columns 62-64 of the requisition in accordance with the following:

RDD EntryDescription

999

Critical requirement (see NAVSUP P-485 Vol I par. 3028 for qualification criteria)

777

Expedite handling (see NAVSUP P-485 Vol I par. 3028 for qualification criteria)

Numeric consecutive day of the calendar year (i.e., the Julian date less the first digit)

Material is required earlier than the computed Standard Delivery Date (see NAVSUP P-485 Vol I par. 3050 for qualification criteria)

X entered in position 62 of the requisition, and the number of months that should elapse before material is to be delivered entered in positions 63-64.

The latest acceptable delivery date. Material may be delivered at any time prior to the RDD (see NAVSUP P-485 Vol I par. 3050 for additional information).

S entered in position 62 of the requisition, and the number of months that should elapse before material is to be delivered entered in positions 63-64.

The latest acceptable delivery date. Material should not be shipped any sooner than 50 days prior to the RDD (see NAVSUP P-485 Vol I par. 3050 for additional information).

## ADVICE CODES (RECORD POSITIONS 65-66)

This field serves a dual purpose. An Advice Code may be entered by the requisitioner to provide coded instructions to supply sources when such data is considered essential to supply action. When the requisition is processed, a Status Code is inserted in this field to provide the recipient(s) of status with information regarding action taken.

When the requisition is processed, a Status Code is inserted in this field to provide the recipient(s) of status with information regarding action taken.

**INTER-SERVICE STATUS CODES**

<u>Code</u>	<u>Explanation</u>
BA	Item being processed for release and shipment. The estimated shipping date is contained in rp 70-73 when provided in response to a follow-up.
BB	Item back ordered against a due-in to stock. The estimated shipping date for release of material to the customer is contained in rp 70-73.
BC	Item on original requisition containing this document number has been back ordered. Long delay is anticipated and estimated shipping date is in rp 70-73. Item identified in the stock number field (or Remarks field if stock number field cannot accommodate the item number), which is not an automatic/coordinate substitute, can be furnished. The price of the substitute item is in rp 74-80. If desired, submit a cancellation for the original requisition and submit a new requisition (using new document number and current julian date) for substitute.
BD	Requisition is delayed due to need to verify requirements relative to authorized application, item identification, or technical data. Upon completion of review, additional status will be provided to indicate action taken.
BE	Depot/Storage activity has a record of the MRO but no supporting record of the action taken (depot/Storage activity response to ICP request for MRO status, for use with DOC ID AE6 only).
BF	No record of your document for which your DI AF_ follow-up or cancellation request was submitted. Also used by a supply source to indicate no record of a GFM requisition for which a DI AX2 transaction has been received. <ol style="list-style-type: none"> <li>(1) If received in response to a cancellation request, subsequently received requisitions (A0_) or other documents (AM_, AT_) will be returned by the supply source with BF status. De-obligate funds and, if item is still required, submit new requisition using a new document number with current julian date.</li> <li>(2) If received in response to a follow-up request (AF_), supply source action to process future documents will continue under regular MILSTRIP procedures.
